Customers will enjoy the ability to place orders online with a fully configurable site driven by live availability.

- Orders entered by your customers are automatically entered into Triumph Back Office.
- Manage what available quantities customers see based on the availability template they are assigned to.
- Control what quantities customers receive by allocating the order after it has been placed online.
- Promote hot list photos on the site along with catalog photos. It's easy to update photos.
- Use many different configuration options or templates for the look and feel of the site.
