

# Fall Version Release

## Learn About the New Tools Available

Want to learn how to implement the new tools? [Email us now.](#)

### Landscape Hub Plug-In

Turn on your Landscape Hub Plug-In. Sync any available template to Landscape Hub for live automated availability. New orders from Landscape Hub push into SBI instantly. Turn up your sales with Landscape Hub to increase your sales today.

**Be Live in 48 Hours, it's Easy. Contact Us Today.**

### PO & Vouchers in Triumph

Purchase Orders & Vouchers are now available in Triumph Format Screens. Now you can set up your screens using the Template format you know and love. This new format dramatically increases how quickly you can create POs and Receive in Vouchers. SBI Classic is being put out to Pasture!

### Flow App

Assigning tasks to field teams, assigning inventory moves, dumps, counts, and more. The TO DO list is the app. Users can go to their TO DO list and complete inventory changes right in the list without having to use Inventory Mobile.

**Now in Spanish & Runs Offline**

### Broker API

Turn on business with any broker using SBI Broker API. Brokers can pull live availability and pricing along with pushing in live orders. Broker API gives any broker live integration with your system without any VAN EDI costs.

### PO Gen & Special Ord

Now your sales team can queue up special order material for your purchasing team. Streamline purchasing, receiving, and notifying your customer that product has arrived.

[Learn the Basics](#)

### Online Digital Catalog

Online orders now include the option to provide a full digital catalog. Fully searchable by your customers and they can book an order to start a conversation.

**Take it live today**

### Analytics Reports

Many new analytics reports are available. Sales history, inventory, production, shipping, purchasing, and order booking analysis.

**Contact us for a free tour**

### Booking Tool

Give your best customers great tools. Export what they purchased last year to excel so they can build a new order for next season. While in Spring, send a sheet with reserved product showing what is ready to ship. Let them drive and fill out what to ship and when. Import excel file to create the release.

## What is Next to Come?

### Winter Version Preview

#### Platform AR

Collecting, applying, and tracking payments has never been easier. Send customer statements, request specific payments, store credit card or ACH on file, and more. Bye-bye SBI Classic and hello easy button.

[Watch Summary Video](#)

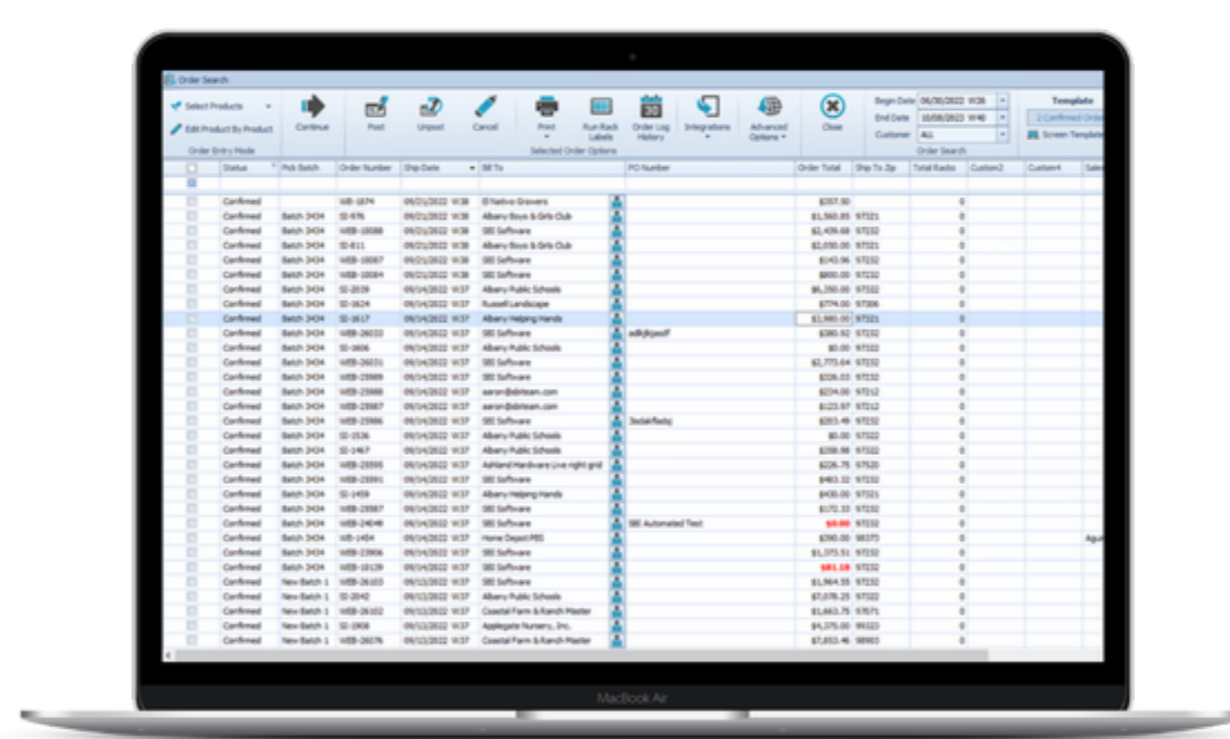

#### Platform Availability

Manage your availability templates from the platform now. Simplified screens make it easy for any level user to manage your inventory visibility. Drive up sales with better controls.

#### Online Orders Refresh

Over 25% of SBI customers now have over 50% of annual sales coming in via online orders. A new version of online orders will be released that will give your customers more self-serve options like pre-pricing and retail barcode management.

## Tip of the Day

### Who Has It On Order?

Writing up an order and quickly want to see who else has that item on order? Try this quick trick to see all other orders with the same item.
