

Important Notice

Log4J vulnerability CVE-2021-44228

Your SBI BackOffice installation is not affected by “CVE-2021-44228, Apache log4j vulnerability”. SBI does not use Java or Log4J in its software.

If you are using SBI cloud hosting - you have no exposure to CVE-2021-44228. SBI has taken the relevant steps to secure your instance (and there was no risk of exploitation).

Your IT department may install utilities or tools that are vulnerable to log4j on your self hosted SBI server, please contact them to determine if there are additional mitigation steps required to secure it.

If you have questions, visit our [Live Chat](#) or create a case via the [Client Tool](#) and our support team will be there to help!

Reminder: Weekly maintenance is scheduled every Tuesday. Maintenance may occur between 6pm and Midnight local time. Downtime is expected to be two hours or less.
